Identification/designation of HMWBs

- Develop reference conditions for suspended sediments
- Consider ongoing effects of vessel movement, maintenance dredging
- Develop decision rules for GEP (not intercalibration); also for Article 4(7)
- Integration with other WGs, ECOSTAT, PRBs

PIANC, CEDA, ESPO, EFIP, INE, EuDA, IADC, EURMIG, EBU

Mitigation considerations

- Recognise natural change including climate change
- Draw on good practice and lessons learned
- Promote sediment management (at both river basin and water body scale)
 - Consider affordability
- Ensure consistency and transparency
